

Sitecore is one of the **most suitable and comprehensive CMS tools** for large companies. It goes beyond managing the content of your website, because it includes **increasingly complex and intelligent skills for marketing area**.

At **Tercer Planeta** we have a **staff of trained and experienced specialists** in the development and implementation of *Sitecore* solutions.

These are our skills:

Create well designed Sitecore **sites from scratch**.

Perform architectural reviews of your site design.

Migrate sites to Sitecore from other platforms.

Resolve problems and issues related to your site.

Add sites to your existing Sitecore installation.

Redesign existing Sitecore sites and **implementing the new design**.

Use **Eloqua and Marketo** automated marketing with Sitecore.

Implement **Sitecore Digital Marketing System (DMS)**

Perform **Sitecore upgrades** to add new Sitecore features.

Perform backups and **maintenance routines** for the health of your site.

Maintain documentation of your site on a ticketing system.

Roll back changes to earlier versions of your site.

Use Sitecore modules to add capabilities to your site.

Extend the functionality of your existing site.

Use **TDS (Team Development for Sitecore)** to protect key Sitecore items source control.

Optimize your site for SEO.
