

At Tercer Planeta S. A. we specialize in one of the best tools in the market for **content management, open source and free licensing: Umbraco.**

Umbraco is **not only a CMS but also an adaptable and extensible development platform** based on Microsoft technologies.

We know how to **create and implement** the most suitable set of tools that Umbraco offers to **adapt them to your specific project.**

That allows us to:

- Create **visually appealing websites** from scratch
- Add websites** to existing facilities
- Migrating sites** from other platforms
- Implement **multilingual support**
- Troubleshoot problems and errors

- Redesign existing sites** and implement new ones
- Perform **architecture revisions**
- Extend functionalities
- Integrate your CMS with automated marketing tools**

- Use **third-party modules to add capabilities** to your deployment
- Update Umbraco environments** with new versions
- Maintain documentation in a ticket system
- Implement **SEO** features to **position your site in higher rankings**

- Reverse changes** back to previous versions
- Implement statistics** using Google Analytics
- Implement your CMS and associated databases in **Azure environments or dedicated servers**
- Ensure that your site **works seamlessly on different devices**
