

nopCommerce is an integrated eCommerce platform based on ASP.NET technology, open source and with a free licensing model.

At Tercer Planeta, we can help to install, setup and customize its features to suit them for the needs of different sizes of businesses.

These are of our skills working with nopCommerce:

Set up the environments to develop, test and publish your e-commerce site from the scratch

Use and integrate third-party modules to add capabilities to your platform, like shipping services and payment services

Configure prices and promotions automation process and methods

Create different sales and clients' characteristics reports

Perform statistics using Google Analytics

Develop new features to your existing e-commerce environment

Implement multiple portals, for each store, brand, affiliate, etc.

Implement multilingual support

Implement store and clients geolocation

Implement SEO features to position your site in higher rankings

Guide the client in the process of configuring rules defined for their own business

Integrate your e-commerce site with a CMS
